

Protect your business by adopting security solutions to combat and fight off security threats such as viruses, unauthorised access and password security.

Our Product Partners:

SAFWORD

- Secure, reliable communications are critical to the success of your business.
- Central administration features offer significant administration savings.
- Avoid major system shutdowns.
- Eliminate password risks with three factor authentication.
- Ensure only trusted users are accessing your networks.
- Your network is only as strong as the weakest password used for access.

As technology has become mainstream at all levels of business, the opportunity to take advantage of technology has also increased. Threats include unauthorised access attempts from the Internet, virus ware, malware, phishing, spam and many more. Threats are getting more and more sophisticated, requiring solutions that are keeping ahead of threats.

BTG has partnered with a range of industry leaders to offer the best protection available in the market. BTG has selected these relationships on their technical performance and capability rather than the size of their marketing budgets

Firewalls

Firewalls form a critical boundary between business and the internet. BTG has significant partnerships with both Juniper Networks and Fortinet, both being market leaders in the Firewall and Unified Threat Management (UTM) market. Key features include L7 inspection, IDP, AntiSpam, Antivirus, and Web Filtering features. Additionally BTG has experience and can support Checkpoint and Cisco Pix solutions.

Antivirus

Antivirus is also a critical part X86 based infrastructure. BTG has key partnership with ESET and Trend Micro antivirus, as well as using UTM Firewalls

Antispam

Spam has been around for some time, and is an ever evolving area. More frequently it is being used to deliver Malware payloads, and provide links to malicious websites. BTG has partnerships with several dedicated Antispam products including the UTM Firewall features.

Web filtering

Website monitoring is an important requirement in Business today because it can give visibility to inappropriate web usage, and it can block inappropriate content and malware infected web sites. BTG has partnerships with Getbusi and WebTitan, UTM Firewalls.

Secure Access and Authentication Verification

Mobility is becoming an increasingly important trend in modern business computing. Wireless, SSL, IPSEC and Token Authentication contribute to security. BTG has partnerships with Juniper Networks, Fortinet and Aladdin Tokens for remote authentication solutions.

Data Loss Prevention

Data Loss Prevention (DLP) is a computer security term referring to systems that identify, monitor, and protect data in use (e.g., endpoint actions), data in motion (e.g., network actions), and data at rest (e.g., data storage). The systems are designed to detect and prevent the unauthorized use and transmission of confidential information. BTG has partnerships with both Fortinet and Trend Micro for DLP solutions.

Delivering complete IT solutions.
